EXPERIENCE

Accenture

2024 – Present

Mandaluyong, Philippines

Software Analyst

2026 – Present

- Automated SQL reporting workflows with Python scripts, cutting manual processing time and reporting errors.
- Validated and optimized SQL queries against production data to troubleshoot and resolve data integrity issues.
- Built and maintained workflow automations using Microsoft Power Automate and Power Apps.
- Maintained and enhanced enterprise Java applications in Oracle environments.
- Used Git and Azure DevOps for version control, branching, and code collaboration across development tasks.

Associate Software Engineer

2024 – 2025

- Completed Full Stack Java training covering Java, Spring Boot, SQL, and ReactJS.
- Provided application support by resolving ServiceNow tickets, troubleshooting Windows and Linux environments, checking application logs, and restarting services to support ongoing operations.
- Collaborated with cross-functional teams to troubleshoot and resolve production issues in a timely manner.

Techomancer Inc.

2023

Web Developer Intern

Quezon City, Philippines

- Developed and maintained web applications using PHP, Laravel, MySQL, JavaScript, HTML, and CSS.
- Used Jira to manage tasks and track progress within Agile sprint cycles.

PROJECTS

Data Analyst Agent | Python, FastAPI, Next.js, LangGraph, Pandas, Plotly

GitHub — Live

- Developed an AI-powered data analysis platform that automates data profiling, exploratory data analysis (EDA), visualization, and AI-generated business insights from CSV and Excel datasets using a LangGraph-based multi-agent workflow.

Azure AI Helpdesk Chatbot | Azure OpenAI, Azure AI Search, Azure AI Foundry, Python

- Built the RAG pipeline for an AI helpdesk chatbot: document preprocessing/chunking, embedding generation via Azure AI Search, and backend integration with Azure OpenAI for grounded responses.

DS Salary Predictor | Python, XGBoost, SHAP, Streamlit

GitHub

- Built an end-to-end ML pipeline predicting data science salaries using XGBoost, applying SHAP to identify key salary drivers such as location and experience level, and deployed results via an interactive Streamlit dashboard.

BabAI | React Native, Expo, FastAPI, Supabase, OpenRouter LLM API

GitHub

- Built a full-stack AI-powered commuter assistant app that alerts users near their destination using GPS proximity detection and real-time push notifications.
- Integrated an LLM-powered in-app chatbot via the OpenRouter API for conversational commuter assistance, with a FastAPI backend and Supabase for data storage.

SpotSecure (Thesis) | Flutter, Python, Plate Recognizer API, OpenCV

GitHub

- Built a smart parking reservation system with automatic license plate recognition, using OpenCV for image preprocessing with the Plate Recognizer API.
- Integrated Flutter, REST APIs, Raspberry Pi, and IoT hardware for automated vehicle access.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript

Frameworks: FastAPI, React Native, LangGraph, Next.js

Databases: PostgreSQL, MySQL, Supabase

Cloud & Tools: Azure, Azure AI Foundry, Azure AI Search, Docker, Git, Azure DevOps, Linux, Power Automate, Power Apps, M365, n8n

AI/ML & Data: Generative AI, RAG, LLM Integration (Azure OpenAI, OpenRouter, Claude), Prompt Engineering, Pandas, XGBoost, SHAP, OpenCV

EDUCATION

Adamson University

2024

B.S. Computer Engineering

Manila
